To whom it may concern.

ÖGOR - Österreichische Gesellschaft für Operations Research - is a non-profit association that aims to promote operations research in practice as well as in research and teaching, and to represent Austrian interests in relevant international professional organizations. ÖGOR is member of the international association EURO, the Association of European Operational Research Societies and IFORS, the International Federation of Operational Research Societies.

ÖGOR promotes publication of high quality papers that cover the theory and practice of operations research thereby spreading knowledge for the scientific as well as industrial community. The Open Journal of Mathematical Optimization (OJMO) will publish original and high-quality articles dealing with every aspect of mathematical optimization, ranging from numerical and computational aspects to theoretical questions related to mathematical optimization problems. The topics covered by the journal fall into the areas of continuous optimization, discrete optimization, optimization under uncertainty, and computational aspects and applications. All these topics are within the scientific interest of ÖGOR. Furthermore, OJMO will publish papers in fair open access for free, meaning that neither the authors nor the reader have to pay to access the content of the published papers. By publishing open access, scholarly publishing returns to its original purpose: to spread knowledge and allow that knowledge to be built upon. The open availability and searchability of research in mathematical optimization will have a significant positive impact on various aspects, from research in pure mathematical aspects to the practice of production management and logistics and to the ability of entrepreneurs to innovate.

ÖGOR is therefore willing to support this initiative. This means that ÖGOR will encourage the community to recognize the value of the papers published in the Open Journal of Mathematical Optimization.

With best regards

ÖGOR Council  
Raimund Kovacevic, Chairman of ÖGOR
